

PERSONA: John Doe

USER STORY/SCENARIO:

John Doe is registering for classes as a Freshman

John Doe logs into the USC Registration App

He begins to review the classes that were recommended by his advisor.

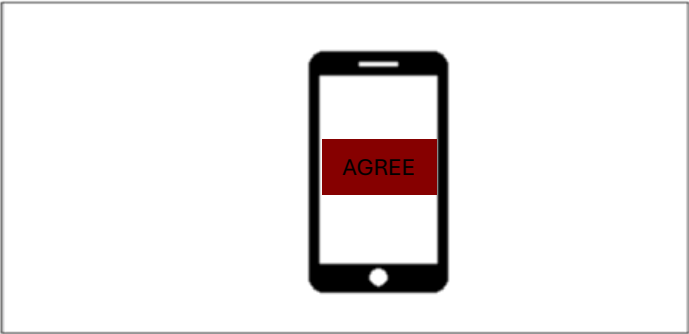

He agrees with all the classes and sends them to the shopping cart.

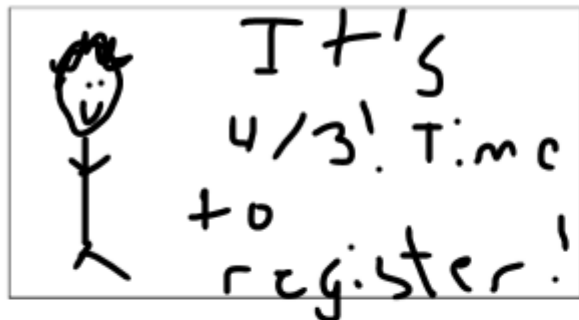

He blocks off the times that he is unable to go to classes and confirms his availability.

The app shows him the available schedules that meet his requirements

He makes his selection and finalizes his choice.

James needs to register for classes

James attempts to login to register for class

Sadly, he's stuck loading for hours due to the amount of students

James and John work diligently to improve the networking

James is re-opening the registration site after fixing the net code

James was finally able to register without network issues!
